Note: If you make changes to a component such as Immunizations in one view and you would like to apply it to all views, you will have to go into each view and make the appropriate changes. For example, if you make changes to Immunizations in the 1 Column Clinical View and you want those changes to apply to Immunizations in your personal view or the 3 Column Clinical View, you will have to go into those views and make the changes again. This applies to all components.
